•

Ideal Candidate

This person should be able to design, write, create, maintain, update and review technical documentation. He/she should possess solid English language writing skills, as well as information design and architecture. As technical writer he/she should not be a Subject Matter Expert, but he/she should be able to produce accurate and comprehensive documents on a precise matter.

Job description

Job requirements:

- 2 up to 3 years of working on the field
- Ability to gather information, analyze subject and produce clear, accurate, complete, unambiguous and, as concise as possible documentation
- Extremely good English language skills
- Very good communication skills
- Willing to work project based
- Telecom experience is a plus, but not a requirement

Computaris is always looking for highly talented people who are up to the challenge of a fast-paced international environment. For the right candidates we offer a very attractive salary and benefits package and a stimulating work environment amongst like-minded people.

Company details

Computaris specializes in software for the mobile telecoms industry. We focus strictly on real-time telecoms-grade systems interfacing to the core mobile network. To meet the demands of this rigorous technical environment we need the most brilliant, dedicated and imaginative software engineers in Romania. We particularly value candidates with telecoms experience, or with knowledge of international business culture and practice.

Computaris is a UK company with offices in Romania, Poland and Moldova. Computaris was founded in

1992 and established its Romanian office in 2000. We aim to be a first-choice employer in the Romanian IT sector, offering career development opportunities including international experience, a favorable remuneration package, a good working environment and the stability of an organically-growing privately-owned company.
