HaynesPro is the leading European supplier of technical data for the automotive industry. We have been serving the automotive market with our unique multilingual database since 1995. If you are looking for maintenance data, repair information, motor management diagnostics and much more for passenger cars, light commercial vehicles or trucks, we can deliver you just that!

We believe in professionalism and integrity and we see each client as a long-term partner, which offer them permanent products and services to the highest quality standards.

Do you find yourself in this description? Are you a dynamic person, enthusiastic and involved? You are passionate about your work? Do you like to work in a team? Then join our team!

We are currently looking for an Electronics/Automotive Technical Writer. As an Electronics/Automotive Technical Writer you are part of the Data-Entry team. It is in charge of the technical content of the database by reworking the original technical data and transforming it to a standardized format, using advanced software. The technical writer collects, analyzes, develops and maintains the important technical data for car makes and models. We use only the original manufacturer's documentation as a source. The source language is English.

Qualification:

Technical degree in Electronics/Automotive engineering is a must;

Profound theoretical knowledge in this area;

Fluent in English and good command of technical language;

Knowledge of electronics and/or automotive

Job Benefits:

The opportunity to be part of a young and professional team

Continuous education and professional development

Competitive Salary
