### Job description

#### Short Company Description

At Hewlett Packard Enterprise, our ideas propel our world faster. We're an industry-leading technology company. And we're accelerating everything we do. With the industry's most comprehensive portfolio, our technology and services help transform our customers around the world to become more efficient, more productive and more secure. They enable our customers to go further. And our employees to develop, learn and advance their careers. Ready to change the world? No one's doing it faster.

Mission: We help customers use technology to slash the time it takes to turn ideas into value. In turn, they transform industries, markets and lives.

Some of our customers run traditional IT environments. Most are transitioning to a secure, cloud-enabled, mobile-friendly infrastructure. Many rely on a combination of both. Wherever they are in that journey, we provide the technology and solutions to help them succeed.

#### Requirements

Bachelor's degree or higher qualification in Computer Science or related technical/communications field

#### Minimum 3 Years' Experience As a Technical Writer

Understands concepts and develops in-depth working knowledge of products, applications and systems in assigned area of responsibility.

Exceptional writing skill

Familiarity with one of the enterprise IT domains (systems, virtualization, networking, storage, databases etc.)

Ability to work on multiple projects

Excellent spoken and written communication in English

#### Responsibilities

Write software documentation in a way that's easy to read and understand

Design and develop guides, tutorials and Help systems for end users, system administrators, support engineers and product developers

Interact with software engineers to understand the products we are developing

Test HPE products to create documentation and provide feedback on product usability and accessibility

Create and maintain HPE information architecture

Familiarity with different operating systems

Experience in documentation Enterprise Software – Example: Systems/networking domain

#### Seniority Level
