

Technical Writer Ia International Contract Engineering Group-ICEPRONAV - BestJobs

The technical writer develops, reviews, edits, completes, rewrites, copy-edits documents and reports according to management needs, requirements and specifications. She/ He has a deep insight and a thorough knowledge of the internal management and reporting systems to be able to produce, as accurately as possible, reports and documents in compliance with pre-established company standards. The technical writer is responsible for creating, adapting, designing, writing, maintaining and updating technical documentation, including online help, user guides, white papers, design specifications, system manuals and other documents. Technical documents and pieces of writing can be created in many working formats: .doc, .pdf, .ppt, after interviewing engineers, management representatives as well as other subject matter experts. A technical writer can approach any subject that needs further explanation for a clearly established, yet diverse, target audience such as: company staff, business people and engineering personnel.
