

Technical Writer - Timisoara

Job Description:

Be an active member of an Information Development team! This team develops and maintains documentation used by customers and technical support personnel in the installation, maintenance, support and configuration of enterprise printing products and software solutions. The end-user documentation is delivered in multiple formats, including on-line help systems built into the products.

This position requires participation in all phases of design, test, development, and/or support of software and hardware products. Apply the latest technologies in an energetic, team-based culture, using state-of-the-art tools and equipment. Work in modern labs and in a development environment designed especially for Software professionals.

Job Requirements:

- University Degree
- Familiar with IT field related technologies and environment
- Ability to collaborate with engineering to translate and develop comprehensive end-to-end and technical documentation for software products
- Good written, reading and spoken Italian/Spanish skills is considered a big plus;
- Excellent written and spoken English skills
- Strong team orientation
