Job description

- Put your technical writing skills to use and sharpen them further, while taking part in our team's ongoing mission to improve Softpedia's vast software applications catalog.
- This is a full-time position, selected candidates will be working from our Bucharest office.

Key responsibilities

- Install, test and evaluate Windows applications
- Write articles (reviews) in English, outlining the software products' features as well as any strong/weak points

Requirements / Skills

- Excellent English and Romanian writing skills
- Strong computer usage and understanding skills, especially Windows (geeks welcome!)
- Good analytical/research skills, attention to detail
- Ability to learn quickly and adapt
- University degree is a plus
- Prior Internet media experience (work as a reviewer, technology reporter or writer and/or a track record of software-related analysis or blogging) is an advantage but not required
- If available, written samples of previous work are welcome

Our offer

- Competitive, negotiable compensation package based on your level of competence and performance
- Young and dynamic work environment
- Excellent career opportunities, the chance to express yourself and reach millions of people around the world through your writing
