An established leader for Value Added Telecommunication Services, **StreamWIDE** assists operators and service providers worldwide in shaping their services innovation. We offer solutions for IP mobile messaging, Call Completion, convergence management, virtual numbers and social telephony, convergent charging, conferencing, virtual contact center solutions, call control and routing. The company is headquartered in Paris (France), with subsidiaries in Romania, the US, Tunisia, China and with multiple sales offices.

We build complex software solutions, having a lot of challenges surrounding the high load nature of the Telecom business. We are actively involved in platform optimization and scalability of our products. Some of the technologies and services we use are Red Hat Linux, PHP, MySQL (with replication), Apache, Nginx, Redis, Memcached, APIs (both as a provider and a consumer, including XML-RPC, JSON-RPC and SOAP). We use a proprietary C application layer for Telecom protocols such as SIP, RTP allowing to
