About Tibco

Headquartered in Palo Alto, Calif., TIBCO Software empowers businesses to their digital destinations by interconnecting everything in real time and providing augmented intelligence for everyone, from business users to data scientists.

With more than 10,000 customers, 3500 employees located in over 30 countries, TIBCO has retained the speed and agility of a start-up. We value and encourage new ideas, direct communication, out-of-the-box thinking, risk-taking and creative problem solving.

We're looking for people who want to make a difference doing a job they love – dynamic individuals willing to take the risks necessary to make big ideas come to life and who are comfortable collaborating in our creative, new-idea-driven environment. We value hard work and provide new opportunities to grow, learn, and excel.

Overview

Are you a high-energy, detail-oriented writing professional with a passion for explaining things?

TIBCO Software has an opening for an innovative and passionate writer to create documentation for GeoAnalytics/Spotfire. Spotfire is the best-in-class software platform for interactive, visual analysis. You'll be writing to Spotfire users around the world who are working in every major industry as they discover trends, identify anomalies and target opportunities.

About this role

The Technical Communication person is an integral part of a small and agile engineering team. The engineering team is comprised of software architects, software developers, quality control engineers, user experience designers, technical communication professionals, support engineers, and product managers.

The team is responsible for their contribution to the development effort of the server, desktop, and mobile products. Because of the fast-moving, close-knit nature of the team, the successful candidate must possess strong knowledge, skills, and abilities in the technical writing discipline as well as strong interpersonal skills.

You will also need the flexibility to work across time zones in our international organization. To be successful in this role, you will need an interest in and aptitude for software, especially client-server architecture, be willing to gain hands-on experience with our products.

Responsibilities

The job holder will be expected to perform the following:-

In this role, you will plan, write, and publish task-based content. You will also be responsible for editing and revising developer content.

- Strong self-starter with the ability to anticipate content requirements.

- Interview and collaborate with team members to plan and create content.
- Build deep product knowledge through hands-on experience.
- Understand product requirements in order to create content development plans.
- Use structured authoring tools to create task-based content.
- Create content that conforms to our style guide and principles of global English.

Qualifications

- Experience in creating clear and concise documentation for a technical audience.
- 3+ years of technical writing experience using a structured authoring approach.
- Ability to plan your work to meet deadlines.
- Strong communication skills as a presenter and as a writer.

Please note you must have full working rights for the country you are applying for. If on a work permit or visa please make sure the details along with expiry date are included on your application.

Applications and CVs MUST be in English.

TIBCO is an equal opportunities employer and welcome applications from all suitably qualified persons regardless of their race, sex, disability, religion/belief, sexual orientation or age.
