

# Technical Writer Ia WIRTEK CLUJ-NAPOCA - BestJobs

We are looking for a Technical Writer, who understands technical telecom products and who is able to communicate the technical message in a clear and concise way for the user.

## Main responsibilities

- Maintain, update and improve existing manuals, quick guides, etc.
- Create user guides, product documentation, setup instructions, application notes, etc. for telecom products.

You will work closely together with many teams in the organization such as Test, R&D, Support and Product Management, and you must be able to independently seek the information needed for the creation of the product documentation.

## Requirements

- University degree (technical, languages)
- Experience with making engineering technical documentation
- Experience with Word, FrameMaker and graphic programs like QuarkXpress
- Applicant must be on an experienced level of being able to proactively update and improve technical documentation.

## Your Profile

We expect that you:

- Have excellent communication skills
- Have excellent English language skills
- Have technical flair and understanding
- Can work independently and focused
- Are structured
- Have high level of quality requirements
